DESCRIPTION OF WORK

Installation of (2) ground mounted solar electric systems consisting of (158) solar panels and (7) inverters. This system will be mounted to and secured to ground screws which are non toxic and cause very little disturbance to the soil. The (2) arrays are labeled as North and South. The solar energy will offset electricity used at the barn and apprentice house. The nearest wetland body is 145' from the solar array and within the 50' buffer requirement. The entire footprint is within setback boundaries. The conservation easement for this property allows solar, please refer to the attached documentation.

Estimated Start 11 / 15 / 2021 Estimated Finish 12 / 20 / 2021 Estimated Value \$ 175,121
