## RULES AND REGULATIONS OF SEWER USE

### TOWN OF WILTON, NEW HAMPSHIRE

This ordinance sets forth uniform requirements for contributors into the wastewater collection and treatment system for the Town of Wilton, N.H. and enables the Town to comply with all applicable State and Federal Laws required by the Clean Water Act of 1977 and the General Pretreatment Regulations (40 CFR, Part 403).

The objectives of this ordinance are:

- A. To prevent the introduction of pollutants into the municipal wastewater system which will interfere with the operation of the system or contaminate the resulting, sludge;
- B. To prevent the introduction of pollutants into the municipal wastewater system which will pass through the system, inadequately treated, into receiving waters or the atmosphere or otherwise be incompatible with the system;
- C. To improve the opportunity to recycle and reclaim wastewater and sludge from the system; and
- D. To provide for equitable distribution of the cost of the municipal wastewater system.

This ordinance provides for the regulation of contributors to the municipal wastewater system through the issuance of permits to certain non-domestic users and through enforcement of general requirements for the other users, authorizes monitoring and enforcement activities, requires user reporting, assumes that existing customers' capacity will not be preempted, and provides for the setting of fees for the equitable distribution of costs resulting from the program established herein.

This ordinance shall apply to the Town of Wilton, N.H. and to persons outside the Town who are, by contract or agreement with the Town, Users of the Town POTW. Except as otherwise provided herein, the Wilton Sewer Commission shall administer, implement, and enforce the provisions of this ordinance.

Be it ordained and enacted by the Board of Sewer Commissioners, of the Town of Wilton, State of NH.

## ARTICLE 1

### Definitions

Unless the context specifically indicates otherwise, the following terms and phrases, as used in this ordinance, shall have the meanings hereinafter designated:

#### SECTION 1

"Act" or "the Act" shall mean the Federal Water Pollution Control Act, also known as the Clean Water Act, as amended, 33 U.S.C. 1251, et. seq.

#### SECTION 2

"Approval Authority" shall mean the Director in an NPDES state with an approved State Pretreatment Program and the Administrator of the EPA in a non-NPDES state or NPDES state without an Approved State Pretreatment Program.

#### SECTION 3

"Authorized Representative of Industrial User" An authorized representative of an Industrial User may be: (1) A principal executive officer of at least the level of vice-president, if the Industrial User is a corporation; (2) A general partner or proprietor if the Industrial User is a partnership or proprietorship, respectively; (3) A duly authorized representative of the individual designated above if such representative is responsible for the overall operation of the facilities from which the direct discharge originates.

#### SECTION 4

"Biochemical Oxygen Demand (BOD)" shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure, five (5) days at 20 degrees centigrade expressed in terms of weight and concentration (milligrams per liter) (mg/l).

#### SECTION 5

"Building Drain" shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer, beginning five (5) feet (1.5 meters) outside the inner face of the building wall.

#### SECTION 6

"Building Sewer" shall mean the extension from the building drain to the public sewer or other place of disposal, also called house connection. Building sewers, after completion of construction of a building sewer lateral as defined in Article 1, Section 7, shall be maintained from the building to the property line by the owners of the property served. The Town shall maintain the building sewer from the property line to the main sewer. That portion of the building sewer which lies within the boundaries of the property served shall be constructed by said property owner.

SECTION 7

"Building Sewer Lateral" shall mean a pipe or conduit laid incidental to the original construction of a public sewer, from that public sewer to some point at the side of the street, highway, or similar location, and there capped, having been provided and intended for extension and of use at some time thereafter as part of a building sewer as defined in Article 1, Section 6.

SECTION 8

"Categorical Standards" shall mean National Categorical Pretreatment Standards or Pretreatment Standard as defined in Article I, Section 28.

SECTION 9

"Combined Sewer" shall mean a sewer intended to receive both surface runoff and polluted and unpolluted wastewater.

SECTION 10

"Control Authority" shall refer to the "Approval Authority", defined hereinabove; or the Superintendent if the town has an approved Pretreatment Program under the provisions of HO CFR, 403.11.

SECTION 11

"Direct Discharge" shall mean the discharge of treated or untreated wastewater directly to the waters of the State of New Hampshire.

SECTION 12

"Commissioners" shall mean the Wilton Board of Sewer Commissioners, acting on behalf of the Town of Wilton, or their authorized deputy, agent, or representative.

SECTION 13

"Division" shall mean the Water Supply and Pollution Control Division of the New Hampshire Department of Environmental Services.

SECTION 14

"Domestic Wastewater" or "Sanitary Sewage" shall mean normal water, carried household and toilet wastes or waste from sanitary conveniences, excluding ground, surface or storm water.

SECTION 15

"WHO" shall mean authorized personnel of the Wilton Highway Department acting through the Board of Sewer Commissioners.

#### SECTION 16

"Easement" shall mean an acquired legal right for the specific use of land owned by other.

#### SECTION 17

"Environmental Protection Agency" or "EPA" shall mean the U.S. Environmental Protection Agency, or where appropriate the term may also be used as a designation for the Administrator or other duly authorized official of said agency.

#### SECTION 18

"Floatable Oil" is oil, fat, or grease in a physical state such that it will separate by gravity from wastewater by treatment in an approved pretreatment facility. A wastewater shall be considered free of floatable fat if it is properly pretreated and the wastewater does not interfere with the collection system.

#### SECTION 19

"Garbage" shall mean the animal and vegetable waste resulting from the handling, preparation, cooking, and serving of foods.

#### SECTION 20

"Grab Sample" is a sample which is taken from a waste stream on a one-time basis.

#### SECTION 21

"Grease" shall mean volatile and non-volatile residual fats, oils, fatty acids, soaps, waxes, mineral oils and other similar materials.

#### SECTION 22

"Grit" shall mean heavy inorganic matter such as stone, gravel, cinders, sand, silt, ashes, and heavy particulate matter such as corn kernels, bone chips, coffee grounds, etc.

#### SECTION 23

"Holding Tank Waste" shall mean any waste from holding tanks such as vessels, chemical toilets, campers, trailers, septic tanks, and vacuum-pump tank trucks.

#### SECTION 24

"Indirect Discharge" shall mean a discharge which is made to sewers leading to a wastewater treatment facility.

#### SECTION 25

"Industrial User" shall mean a user of POTW services who makes an indirect discharge of industrial wastewater.

#### SECTION 26

"Industrial Wastes" shall mean any liquid, gaseous or solid waste substance resulting from any process of industrial manufacturing, trade or business or from development of any natural resources and is distinct from sanitary sewage.

#### SECTION 27

"Interference" shall mean the inhibition or disruption of the POTW treatment processes or operations which contributes to a violation of any requirement of the Town's NPDES Permit. The term includes prevention of sewage sludge use or disposal by the POTW in accordance with Section 405 of the Act, (33 U.S.C. 1345) or any criteria, guidelines, or regulations developed pursuant to the Solid Waste Disposal Act (SWDA), the Clean Air Act, the Toxic Substances Control Act, or more stringent state criteria (including those contained in any State sludge management plan prepared pursuant to Title IV of SWDA) applicable to the method of disposal or use employed by the POTW.

#### SECTION 28

"National Categorical Pretreatment Standard" or "Pretreatment Standard" shall mean any regulation containing pollutant discharge limits promulgated by the EPA in accordance with Section 307 (b) and (c) of the Act (33 U.S.C. 1347) which applies to a specific category of Industrial Users.

#### SECTION 29

"National Pollution Discharge Elimination System" or "NPDES Permit" shall mean a permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342).

#### SECTION 30

"National Prohibitive Discharge Standard" or "Prohibitive Discharge Standard" shall mean any regulation developed under the authority of 307 (b) of the Act and 40 CFR, Section 403.5.

#### SECTION 31

"Natural Outlet" shall mean any outlet including storm sewers and combined sewer overflows into a water-course, pond, ditch, lake or other body of surface or ground water.

#### SECTION 32

"New Source" shall mean any building, structure, facility or installation from which there is or may be a Discharge of Pollutants, the construction of which commenced after the publication of proposed Pretreatment Standards under Section 307 (c) of the Act which will be applicable to such source if such standards are thereafter promulgated in accordance with that section.

### SECTION 33

"Pass Through" shall mean the Discharge of Pollutants through the POTW into navigable waters in quantities or concentrations, which, alone or in conjunction with discharges from other sources, is a cause of a violation of any requirements of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation) or of applicable water quality criteria.

### SECTION 34

"Person" shall mean any individual, partnership, co-partnership, firm, company, trust, estate, governmental entity or any other legal entity or their legal representatives, agents or assigns. The masculine gender shall include the feminine, the singular shall include the plural where indicated by the context.

### SECTION 35

"pH" shall mean the logarithm of the reciprocal of the weight of hydrogen ions in grams per liter of solution.

### SECTION 36

"Pollution" shall mean the man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water.

### SECTION 37

"POTW Treatment Plant" shall mean that portion of the POTW designed to provide treatment to wastewater.

### SECTION 38

"Pretreatment or Treatment" shall mean the reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater to a less harmful state prior to or in lieu of discharging or otherwise introducing such pollutants into a POTW. The reduction or alteration can be obtained by physical, chemical or biological processes or process changes by other means, except as prohibited by 40 CFR, Section 403.6 (d).

### SECTION 39

"Pretreatment Requirements" shall mean any substantive or procedural requirement related to pretreatment, imposed on an industrial user, including a National Categorical Pretreatment Standard.

### SECTION 40

"Properly Shredded Garbage" shall mean the animal and vegetable wastes from the preparation, cooking, and dispensing of foods that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half (1/2) inch [(1.27 centimeters)] in any dimension.

#### SECTION 41

"Public Sewer" shall mean the common sewers owned, controlled and maintained by the Town for the conveyance of waste or sewage from several properties, and shall not be understood to include building sewers or connections between the public sewer and individual properties, which building sewers are maintained by the owners of the properties using them.

#### SECTION 42

"Regional Point Sources" shall mean any point source(s) of discharge from a town connected to the Wilton sewage works under the regional concept of wastewater collection and treatment plan.

#### SECTION 43

"Sanitary Sewer" shall mean a sewer which carries sewage or polluted wastewater, and together with minor quantities of storm, surface, and groundwater which are not intentionally admitted.

#### SECTION 44

"Sewage" or "Wastewater" shall mean a combination of the water-carried wastes from residences, business buildings, institutions, and industrial establishments, together with such ground, surface, and storm waters as may be present.

#### SECTION 45

"Sewage Treatment Plant" or "Wastewater Treatment Plant" shall mean any arrangement of devices and structures used for treating sewage.

#### SECTION 46

"Sewage Works" shall mean all facilities for collecting, pumping, treating, and disposing of sewage.

#### SECTION 47

"Sewer" shall mean a pipe or conduit for carrying sewage or wastewater.

#### SECTION 48

"Shall" is mandatory; "May" is permissive.

#### SECTION 49

"Significant Industrial User" shall mean any Industrial User of the Town's wastewater disposal system who (1) has a discharge flow of 25,000 gallons or more per average work day, or (2) has a flow greater than 5% of the flow in the Town's wastewater treatment system, or (3) has in his wastes toxic pollutants as defined pursuant to Section 307 of the Act, or (/») is found by the Town, New Hampshire Water Supply and Pollution Control Division or the U.S. Environment Protection Agency (EPA), to have significant impact, either singly, or in combination with other contributing industries, on the wastewater treatment system, the quality of sludge, the system's effluent quality, or air emissions generated by the system.

#### SECTION 50

"Slug" shall mean any discharge of water, wastewater, or industrial waste which, in concentration of any given constituent or in quantity of flow, exceeds for any period of duration longer than fifteen (15) minutes, more than five (5) times the average twenty-four (24) hour concentration or flows during normal operation or which adversely affect the collection system and/or performance of the wastewater treatment works.

#### SECTION 51

"Spill" shall mean the release, accidental or otherwise, of any material not normally released to the POTW which, by virtue of its volume, concentration or physical or chemical characteristics, creates a hazard to the POTW, their operation or their personnel. Such characteristics shall include, but are not limited to volatile, explosive, toxic or otherwise unacceptable materials.

#### SECTION 52

"Standard Industrial Classification (SIC)" shall mean a classification pursuant to the Standard Industrial Classification Manual issued by the Executive Office of the President, Office of Management and Budget.

#### SECTION 53

"State" shall mean State of New Hampshire.

#### SECTION 54

"Storm Drain" (sometimes termed "Storm Sewer") shall mean a drain or a sewer for conveying water, groundwater, subsurface water, or polluted water from any source.

#### SECTION 55

"Storm Water" shall mean any flow occurring during or following any form of natural precipitation and resulting therefrom.

#### SECTION 56

"Superintendent" shall mean the Superintendent of the Wilton Wastewater Treatment Plan acting under the direction of the Wilton Sewer Commission, or the Public Works Director if so authorized by the Wilton Sewer Commission.

#### SECTION 57

"Suspended Solids" shall mean total suspended matter that either floats on the surface of, or is suspension in water, wastewater or other liquids, and is removable by laboratory filtering, as prescribed by Standards Methods for the Examination of Water and Wastewater and referred to as a non-filterable residue.

#### SECTION 58

"Town" shall mean the Town of Wilton or the Board of Sewer Commissioners.

SECTION 59

"Town of Wilton" shall mean the area of the Town as shown on U.S.G.S. Wilton, N.H., quadrangle (fifteen minute series).

SECTION 60

"Unpolluted Water" is water of quality equal to or better than the effluent criteria in effect or water that would not cause violation of receiving water quality standards and would not be benefited by discharge to the sanitary sewers and wastewater treatment facilities provided.

SECTION 61

"User" shall mean any person who contributes, causes or is responsible for the contribution of wastewater into the Town's POTW.

SECTION 62

"Wastewater" or "Sewage" shall mean a combination of the water-carried wastes from residences, business buildings, institutions, and industrial establishments, together with such ground, surface, and storm-waters as may be present.

SECTION 63

"Industrial Discharge Agreement" shall mean an Industrial Discharge Agreement as set forth in Article IV, Section 9 of this Ordinance.

SECTION 64

"Wastewater Facilities" shall mean the structures, equipment and processes required to collect, carry away, and treat domestic and industrial wastes and dispose of the effluent.

SECTION 65

"Wastewater Treatment Works" shall mean an arrangement of devices and structures for treating wastewater, industrial wastes, and sludge. Sometimes used as synonymous with "waste treatment plant" or "wastewater treatment plant" or "water pollution control plant" or "wastewater treatment facility", or "Publicly Owned Treatment Works (POTW)".

SECTION 66

"Watercourse" shall mean a natural or artificial channel in which a flow of water occurs, either continuously or intermittently.

SECTION 67

"Waters of the State" shall mean all streams, lakes, ponds, marshes, watercourses, waterways, wells, springs, reservoirs, aquifers, irrigation systems, drainage systems and all other bodies or accumulations of water, surface or underground, natural or artificial, public or private, which are contained within, flow through, or border upon the State or any portion thereof.

## SECTION 68

### Abbreviations

The following abbreviations shall have the designated meanings:

BOD - Biochemical Oxygen Demand.

CFR - Code of Federal Regulations.

COD - Chemical Oxygen Demand.

EPA - Environmental Protection Agency.

/ - Liter

mg - Milligrams.

mg/l - Milligrams per liter.

NPDES - National Pollutant Discharge Elimination System.

POTW- Publicly Owned Treatment Works.

SIC - Standard Industrial Classification.

SWDA - Solid Waste Disposal Act, 42 U.S.C. 6901, et. seq.

TKN - Total Kjeldahl Nitrogen

USC - United States Code.

TSS - Total Suspended Solids.

WS&PCD-Water Supply and Pollution Control Division of the Department of Environmental Services.

## **ARTICLE II Building Sewers and Connections**

### **SECTION 1**

No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Board of Sewer Commissioners.

### **SECTION 2**

There shall be two (2) classes of building sewer permits: (A) for residential and commercial service discharging only domestic wastewater and (B) for service to establishments producing industrial wastes. In either case, the owner or his agent shall make application on a special form furnished by the Board of Sewer Commissioners. The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the Board of Sewer Commissioners.

There shall be a permit application and inspection fee of fifty (\$50) dollars for a residential or commercial building sewer permit and seventy-five (\$75) dollars for an industrial building sewer permit, paid to the Town of Wilton at the time the application is filed. Twenty-five (\$25) dollars will be retained as a processing charge, if a sewer permit is not granted. **STRIKE IN 2017 AS IT HASN'T BEEN COLLECTED**

All new sewer services to be connected to the **existing** sewer system shall be subject a one-time connection / entrance fee of \$900; see also Article V. **\$FEE 2014**

All fees required by this article shall be paid to the **TOWN OF WILTON.**

### **SECTION 3**

All costs and expenses incident to the installation and connection of the building sewer from the main to the building shall be borne by the Owner. The Owner shall indemnify the Board of Sewer Commissioners and the Town from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

### **SECTION 4**

A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway. The building sewer from the front building may be extended to the rear building and the whole considered as one building sewer. In any event, any connection to any public sewer or any building sewer shall require a permit of the Wilton Sewer Commission and the WS&SPCD.

The Town of Wilton and the Board of Sewer Commissioners do not and will not assume obligation or responsibility for damage caused by or resulting from any such single connection aforementioned.

### **SECTION 5**

Old building sewers may be used in connection with new buildings only when they are found, on examination and testing by the Wilton Sewer Commission, to meet all requirements of this ordinance.

## SECTION 6

The size, slope, alignment, materials of construction of a building sewer and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the Town and/or State. In the absence of code provisions or in amplification thereof, the materials and procedures set forth in appropriate specification of the American Society of Testing Materials (ASTM) and the Water Pollution Control Federal (WPCF) Manual of Practice No. 9 shall apply. Final interpretations shall be by the Wilton Sewer Commission.

## SECTION 7

Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

## SECTION 8

No person shall have or make connection of sump pumps, roof downspouts, exterior foundation drains, area-way drains, other sources of surface runoff, ground water and unpolluted wastewater to a building sewer or building drain which, in turn, is connected directly or indirectly to a public sanitary sewer.

## SECTION 9

The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the Town and/or State, or the procedures set forth in appropriate specification of the ASTM and the WPCF Manual of Practice No. 9. All such connections shall be made gas tight and watertight, and verified by proper testing. Any deviation from the prescribed procedures and materials must be approved by the Wilton Sewer Commission before installation.

## SECTION 10

It shall be unlawful for any person to place, deposit or permit to be deposited in any unsanitary manner on public or private property within the Town of Wilton, or in any area under the jurisdiction of the Wilton Sewer Commission and the WS&PCD, any animal excrement other than that used for fertilizer, human excrement, garbage or objectionable waste.

## SECTION 11

It shall be unlawful to discharge to any natural outlet within the Town of Wilton or in any area under the jurisdiction of Wilton and the WS&PCD any wastewater or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provision of this ordinance.

## SECTION 12

Except as hereinafter provided in Sections 13 and 14 of this ARTICLE, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of wastewater.

## SECTION 13

The Owner(s) of all houses, buildings or properties used for human occupancy, employment, recreation or other purposes situated within Wilton and abutting on any street, alley or right-of-way in which there is now located a public sanitary sewer of Wilton is hereby required, at Owner(s) expense, to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this ordinance within ninety (90) days after the date of official notice to do so provided that said public sewer is within one hundred (100) feet (30.5 meters) (200 ft 61 meters) of the building.

Extensions of time greater than ninety (90) days may be granted by the Wilton Sewer Commission to individual property Owner(s) upon appeal. Said extension shall be granted only when it can be demonstrated that the connection to the public sewer system would create an undue financial hardship upon the Owner(s) and that an agreement between the Owner(s) and the Wilton Sewer Commission be enacted. Said agreement shall be conditioned on the following:

- A) That the wastewater from the subject property not be discharged directly into receiving waters.
- B) That the property is served by an acceptable subsurface disposal system as determined by the Wilton Sewer Commission.
- C) That the agreement is non-transferable: that is, new Owner(s) must connect up to sewer system within ninety (90) days of passing papers or secure an extension of time as outlined in this ARTICLE.

## SECTION 14

In areas where there are no public sanitary sewers or none within one hundred (100) feet (30.5 meters) of the building, wastewater disposal shall be accomplished by privy, privy vault, septic tank, cesspool or other facility, provided said facility is designed and constructed in compliance with all requirements of the Wilton Sewer Commission and the WS&PCD.

## SECTION 15

The applicant for the building sewer permit shall notify the WHD when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the representative of the WHD.

## SECTION 16

All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the WHD.

## SECTION 17

Should there be a stoppage or flow back-up found to be in the building sewer and assistance is requested by the Owner to the WHD, costs for the work effort by the WHD in freeing the stoppage shall be assessed to the Owner. Charges will be based on time and material, but shall not be less than a minimum amount of twenty-five (\$25) dollars, payable to the WHD for each service resulting from the Owner's request. All funds paid on account of this paragraph shall be payable to the TOWN OF WILTON.

## SECTION 18

Any person proposing a new discharge into the system or a substantial change in the volume or character of pollutants that are discharged into the system shall notify the Wilton Sewer Commission at least 60 days prior to the proposed change or connection. Proposed new discharges from residential or commercial sources involving loading exceeding 50 population equivalents, or 5000 gallons per day, or any increase in industrial discharge must be approved by the WS&PCD.

## SECTION 19

The following is an excerpt from the regulations of the WS&PCD: "Except for special reasons, the WS&PCD will approve plans for new systems, extensions, or replacement sewers only when designed upon the separate plan, in which rain water from roofs, streets and other areas, and groundwater from foundation drains are excluded."

## ARTICLE III Use of the Public Sewers

### SECTION 1

No User shall contribute or cause to be contributed, directly or indirectly, any pollutant or wastewater which will interfere with the operation or performance of the POTW. These general prohibitions apply to all Users of a POTW whether or not the User is subject to National Categorical Pretreatment Standards or any other National, State or local Pretreatment Standards or requirements.

### SECTION 2

No person shall discharge or cause to be discharged any storm-water, surface-water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water or unpolluted industrial process waters to any sanitary sewer.

### SECTION 3

Storm-water and all other unpolluted drainage shall be discharged to drains or such conduits as are specifically designated as storm sewers or to a natural outlet approved by the Wilton Sewer Commission. Industrial cooling water or process waters require an NPDES permit prior to discharge to a storm sewer or natural outlet.

### SECTION 4

No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

A) Any liquids, solids or gases, which by reason of their nature or quantity are, or may be, sufficient either alone or by interaction with other substances to cause fire or explosion or be injurious in any other way to the POTW or to the operation of the POTW. Prohibited materials include, but are not limited to, gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, per-chlorates, bromates, carbides, hydrides and sulfides and any other substance which is a fire or explosion hazard or a hazard to the system.

B) Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the wastewater facilities such as, but not limited to, ashes, bones, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, un-ground garbage, whole blood, paunch manure, hair, fleshings and entrails and paper dishes, cups, milk containers, disposable diapers and wipes, tampons, sanitary napkins, bandages, etc., either whole or ground by garbage grinders. Additionally, items such as 'disposable' diapers, sanitary wipes, feminine products, paper towels shall not be flushed in toilets.

C) Any wastewater having a pH less than 6.0 or greater than 9.0 unless the POTW is specifically designed to accommodate such wastewater, or wastewater having any other corrosive property capable of causing damage or hazard to structures, equipment, and/or personnel of the POTW.

- D) Any wastewater containing toxic pollutants in sufficient quantity, either singly or by interaction with other pollutants, to injure, pass through, or cause interference with any wastewater treatment process, constitute a hazard to humans or animals, create a toxic effect in the receiving waters of the POTW or to exceed the limitation set forth in a Categorical Pretreatment Standard. A toxic pollutant shall include but not be limited to any pollutant identified pursuant to Section 307 (a) of the Act.
- E) Any **noxious** or malodorous liquids, gases or solids which either singly or by interaction with other wastes are sufficient to create a public nuisance or hazard to life or sufficient to prevent entry into the sewers for maintenance and repair.
- F) Any substance which may cause the POTW's effluent or any other product of the POTW such as residues, sludge or scums to be unsuitable for reclamation and reuse or to interfere with the reclamation process. In no case shall a substance discharged to the POTW cause the POTW to be in non-compliance with sludge use or disposal criteria, guidelines or regulations developed under Section 405 of the Act; any criteria, guidelines, or regulations affecting sludge use or disposal developed pursuant to the Solid Waste Disposal Act, the Clean Air Act, the Toxic Substances Control Act or State criteria applicable to the sludge management method being used.
- G) Any substance which will cause the POTW to violate its NPDES and/or State Disposal System Permit or the receiving water quality standards.
- H) Any wastewater with objectionable color not removed in the treatment process such as but not limited to dye wastes and vegetable tanning solutions.
- I) Water sufficiently hot to cause the influent at the wastewater treatment facilities to exceed 104 degrees F (40 degrees C) or cause inhibition of biological activity in the POTW.
- J) Quantities of flow, concentrations or both which constitute a "slug" as defined herein.
- K) Any wastewater containing any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.
- L) Any wastewater which causes a hazard to human life or creates a public nuisance.

#### SECTION 5

The following described substances, materials, waters or waste shall be limited in discharges to municipal systems to concentrations or qualities which will not harm either the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger lives, limb, public property or constitute a nuisance. Wilton Sewer Commission may set limitations lower than the limitations established in these regulations if in their opinion such more severe limitations are necessary to meet the above objectives. In forming their opinion as to the acceptability, the Wilton Sewer Commission will give consideration to such factors as the quantity of subject waste in relation to flows and velocities in the sewers, materials of construction of the sewers, the wastewater treatment process employed, capacity of the

wastewater treatment plant, degree of treatability of the waste in the wastewater treatment plan and other pertinent factors. The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the Wilton Sewer Commission are as follows:

A) Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of twenty-five (25) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two/ degrees (32 degrees F) and one hundred and four degrees (104 degrees F) or between zero degrees (0 degrees C) and forty degrees (40 degrees C).

B) Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Wilton sewer commission.

Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments or similar places where garbage originates from the preparation of food in kitchens for the purpose of consumption on the premises or when served by caterers.

C) Any waters or wastes containing heavy metals, solvents, and similar objectionable or toxic substances to such degree that any such material discharged to the public sewer exceeds the limits established by the Wilton Sewer Commission, the WSSPCD, or the National Categorical Pretreatment Standards, as promulgated by the U.S. Environmental Protection Agency for such materials.

D) Any water or wastes containing odor producing substances exceeding limits which may be established by Wilton Sewer Commission.

E) Materials which **exert**, cause or contain:

(1) Unusual concentrations of inert suspended solids (such as, but not limited to Fullers earth, stone dust, lime slurries and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate), or containing more than 300 parts per million by weight of suspended solids.

(2) Excessive discoloration.

(3) BOD greater than 250 milligrams per liter, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the wastewater treatment works.

(4) Unusual volume of flow, i.e. greater than ten (10) percent of the average daily wastewater flow of Town, or concentration of wastes constituting "slugs" as defined herein.

F) Any noxious or malodorous gas or substance capable of creating a public nuisance.

G) Any water or wastes which, by interaction with other water or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system or create a condition deleterious to structures and treatment processes or otherwise create a public nuisance.

H) Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

I) Wastewater with any of the following constituents at concentrations greater than those indicated below:

<u>Constituent</u>	<u>Maximum Concentration (mg/l)</u>
Aluminum	39.6
Ammonia Nitrogen	25.0
Cadmium	0.57
Chromium	2.77
Copper	0.66
Cyanide	1.20
Lead	0.05
Mercury	0.010
Nickel	3.98
Silver	0.25
Selenium	0.79
Zinc	2.61
Boron	16.0
Chromium VI	1.47
Iron	16.0
Manganese	14.5
Molybdenum	20.0
Phenol	0.71
Sulfate	100.0
Sulfide	2.0
Sulfite	2.0
Total Toxic Organics	5.0

If final pretreatment standards are promulgated by EPA for a particular industrial category that are more stringent than those shown above, the more stringent limitations shall apply.

#### SECTION 6

If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 4 of the ARTICLE, and which, in the judgment of the Wilton Sewer Commission, may have a deleterious effect upon the wastewater facilities, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Wilton Sewer Commission may:

- A. Reject the wastes,
- B. Require pretreatment to an acceptable condition for discharge to the public sewers,
- C. Require control over the quantities and rates of discharge and / or

(D) Require payment to cover added cost of handling and treating wastes.

If Town permits pretreatment or equalization of waste flows, design and installation of pretreatment facilities shall be subject to review and approval of Wilton Sewer Commission and its Consulting Engineer and the WS&PCD, and subject to requirements of all applicable codes, ordinances and laws. Such facilities shall not be connected until said approval is obtained in writing.

Plans and specifications for the proposed pretreatment facility shall be the result of the design of a licensed Professional Engineer of the State of New Hampshire and shall be submitted to the Wilton Sewer Commission for review and written approval before commencing construction. Such approval shall not relieve the Owner of the responsibility of discharging treated waste meeting the requirements of this ordinance.

#### SECTION 7

Grease, oil and sand removal facilities (traps, interceptors, etc.) shall be provided when, in the opinion of Wilton Sewer Commission, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such removal facilities shall not be required for private living quarters or dwelling units. All removal facilities shall be of a type and capacity approved by the Wilton Sewer Commission and shall be located as to be readily and easily accessible for cleaning and inspection, and shall be maintained by the Owner at his expense, in a continuous, efficient operating condition at all times.

In the maintaining of these interceptors, Owner shall be responsible for proper removal and disposal by appropriate means of captured material and shall maintain records of the dates and means of disposal which are subject to review by the Wilton Sewer Commission. Any removal and hauling of the collected materials not performed by the Owner's personnel must be performed by currently licensed waste disposal firms.

SECTION 8 All industrial waste shall be pretreated in accordance with Federal and State regulations and this ordinance to the extent required by applicable National Categorical Pretreatment Standard, State pretreatment standards, or standards established by the Wilton Sewer Commission, Town of Milford, and Superintendent of Milford Wastewater Treatment Plant, whichever is more stringent. Where pretreatment or flow-equalizing are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the Owner(s) at his expense.

#### SECTION 9

When required by the Wilton Sewer Commission, the Owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control structure together with such necessary meters, and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such structure, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the

Wilton Sewer Commission, Town of Milford, and Superintendent of Milford Wastewater Treatment Plant. The structure shall be installed by the Owner at his expense, and shall be maintained by him so as to be safe and accessible at all times. The structure shall usually be situated on the User's premises.

All industries discharging into a public sewer shall perform such monitoring as the Wilton Sewer Commission, Town of Milford, and Superintendent of Milford Wastewater Treatment Plant or duly authorized employees of the Town may reasonably require including installation, use and maintenance of monitoring equipment, keeping records and reporting the result of such monitoring to the Wilton Sewer Commission, Town of Milford, and Superintendent of Milford Wastewater Treatment Plant. Such records shall be made available upon request by the Wilton Sewer Commission, Town of Milford, and Superintendent of Milford Wastewater Treatment Plant to other agencies having jurisdiction over discharges to the receiving waters.

#### SECTION 10

All measurements, tests, and analysis of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, or with the EPA-approved methods published in the Code of Federal Regulations, Title 40, Part 136 (40 CFR 136), and shall be determined at the control structure. In the event that no special control structure has been required, and at the option of the Wilton Sewer Commission, the control structure shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. The particular analysis involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be obtained. Normally but not always, BOD and suspended solids analysis are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.

#### SECTION 11

No statement contained in this article shall be construed as preventing any special agreement or arrangement between the Town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the Wilton Sewer Commission for treatment, subject to payment therefore, provided that such agreements do not contravene any requirements of existing Federal or State laws, and/or regulations promulgated thereunder, are compatible with any User Charge and Industrial Cost Recovery System in effect, and do not waive applicable National Categorical Pretreatment Standards.

#### SECTION 12

Any "spill" as defined in ARTICLE 1 shall be reported immediately to the Superintendent of the Wastewater Treatment Plant, Milford, N.H.

Any damages experienced by the Wilton Sewer Commission and Milford Wastewater Treatment Plant as the result of a spill are considered a violation of this ordinance and costs for repair, replacement or other associated costs are recoverable under ARTICLE IX.

### SECTION 13

The Wilton Sewer Commission may require a user of sewer service to provide information needed to determine compliance with this Ordinance. The requirements may include:

- (A) Wastewater discharge peak rates and volume over a specified time period.
- (B) Chemical analyses of wastewaters.
- (C) Information on raw materials, processes and products affecting wastewater volume and quality.
- (D) Quantity and disposition of specific liquid, sludge, oil, solvent or other materials important to sewer use control.
- (E) A plot plan of sewers of the user's property showing sewer pretreatment facility location.
- (F) Details of wastewater pretreatment facilities.
- (G) Details of systems to prevent and control the losses of materials through spills to the municipal sewer.

### SECTION 14

State requirements and limitations on discharges shall apply in any case where they are more stringent than Federal requirements and limitations or those in this ordinance.

### SECTION 15

The Wilton Sewer Commission reserves the right to establish by amendment of this ordinance more stringent limitations or requirements on discharge to the wastewater disposal system if deemed necessary to comply with the objectives presented in this ordinance.

### SECTION 16

Each User shall provide protection from accidental discharge of prohibited materials or other substances regulated by this ordinance. Facilities to prevent accidental discharge of prohibited materials shall be provided and maintained at the Owner or Users own cost and expense. Detailed plans showing facilities and operating procedures to provide this protection shall be submitted to the Wilton Sewer Commission for review, and shall be approved by the Wilton Sewer Commission and Town of Milford before construction of the facility. All existing Users shall complete such a plan by August 1, 1987. No User who commences contribution to the POTW after the effective date of this ordinance shall be permitted to introduce pollutants into the system until accidental discharge procedures have been approved by the Town. Review and approval of such plans and operating procedures shall not relieve the industrial user from the responsibility to modify the Users facility as necessary to meet the requirements of this ordinance. In the case of an accidental discharge, it is the responsibility of the User to immediately telephone and

notify the POTW of the incident. The notification shall include location of discharge, type of waste, concentration and volume, and corrective actions.

Within five (5) days following an accidental discharge the User shall submit to the Wilton Sewer Commission a detailed written report describing the cause of the discharge and the measures to be taken by the User to prevent similar future occurrences. Such notification shall not relieve the User of any expense, loss, damage, or other liability which may be incurred as a result of damage to the POTW, fish kills, or any other damage to person or property; nor shall such notification relieve the User of any fines, civil penalties, or other liability which may be imposed by this article or other applicable law.

## SECTION 17

Septic tank waste (septage) will be accepted into the sewer system at a designated receiving structure within the treatment plant area, and at such times as are established by the Superintendent, provided such wastes do not contain toxic pollutants or materials, and provided such discharge does not violate any other special requirements established by the Town.

Any person who desires to discharge septage or holding tank wastewater from a domestic source at the Town's wastewater facilities must conform to the following minimum requirements:

(A) The hauler must be registered with the Town of Milford and the State of New Hampshire.

(B) The hauler will be responsible to see that septage or holding tank wastewater does not leak on the ground near the discharge point, and that all exposed areas are washed to remove traces of septage or holding tank wastewater.

(C) The hauler must identify the source, i.e.. Owner's name, address or location of the tank, and volume of septage or holding tank wastewater removed from the tank and discharged to the Town's wastewater facilities.

(D) The septage or holding tank wastewater must not contain toxic pollutants or materials detrimental to the proper operation of the wastewater facilities.

(E) The discharge of industrial wastes as "industrial septage" or "industrial holding tank wastewater" is strictly prohibited without prior approval of the WS&PCD.

The fee for discharging septage and holding tank wastewater shall be set by the Milford Board of Selectmen. This fee will be revised as needed to cover the town's cost to treat the wastes.

The Superintendent of Milford Wastewater Treatment Plant, acting in behalf of the Town of Milford, and Wilton Sewer Commission shall have authority to limit the disposal of such wastes, if such disposal would interfere with the wastewater facilities' operation.

Discharge of sewage, septage or other wastes through a manhole outside the treatment plant area is prohibited and any person unlawfully doing so shall be prosecuted.

#### SECTION 18

It shall be illegal to meet requirements of this Sewer Ordinance by diluting wastes in lieu of proper pretreatment.

## ARTICLE IV

### Industrial Pretreatment

#### SECTION 1

"Applicability" All persons discharging industrial process wastes into public or private sewers connected to the Town's wastewater facilities, shall comply with applicable requirements of federal and state industrial pretreatment regulations (as amended), in addition to the requirements of these INDUSTRIAL PRETREATMENT RULES.

#### SECTION 2

"Industrial Discharge Permit (IDP)."

(A) IDP Required\* Effective 120 calendar days after this ordinance is adopted by the Town, the discharge of any industrial process waste to the Town's wastewater works or to a public or private sewer connected to the Milford wastewater facilities is prohibited without a valid Industrial Discharge Permit (IDP).

(B) IDP Application. Within 60 days after the effective date of this ordinance, persons subject to these rules shall submit an application for an IDP containing information required under applicable federal and state industrial pretreatment reporting regulations. Such information, as a minimum, shall include:

- 1) The name and address of the facility, including the name of the operators and owners.
- 2) A list of all environmental permits held by or for the facility.
- 3) A brief description of the nature, average rate of production, and Standard Industrial Classification of the operations carried out at such facility.
- 4) An identification of the categorical pretreatment standards applicable to each regulated process.
- 5) An analysis identifying the nature and concentration of pollutants
- 6) Information showing the measured averaged daily and maximum daily flow, in gallons per day, to the public sewer from regulated process streams and from other streams.
- 7) A schedule of actions to be taken to comply with discharge limitations.
- 8) Additional information as determined by the Wilton Sewer Commission may also be required.

(C) Provisions. The IDP will outline the general and specific conditions under which the industrial process waste will be accepted for treatment at the Milford wastewater treatment plant. Specifically, included in the Permit are the following:

- 1) Pretreatment and self-monitoring facilities required.
- 2) Type and number of samples and sampling frequency required.
- 3) Effluent limitations on the industrial process waste.
- 4) Reporting Requirements.

(a) Industrial users shall submit periodic reports as required indicating the nature and concentration of pollutants in the discharge from the regulated processes governed by pretreatment standards and the average and maximum daily flow for these process units. The reports shall state whether the applicable categorical pretreatment standards and effluent limitations are being met on a consistent basis and, if not, what additional operation and maintenance practices and/or pretreatment are necessary. Additional requirements for such reports may be imposed by the Town.

(b) Signature for Reports. Reports submitted under this Section shall be signed by an authorized representative as defined in Article I, Section 3.

5) Monitoring Records.

(a) Industrial users subject to the reporting requirements under this Section shall maintain records of information resulting from monitoring activities required to prepare such reports. Such records shall include for each sample:

(i) the date, exact place, method and time of sampling and the names of person or persons taking the sample;

(ii) the dates analyses were performed;

(iii) the laboratory performing the analyses;

(iv) the analytical techniques and methods used; and

(v) the results of such analyses.

(b) Such reports shall be maintained for a minimum of three years and shall be made available for inspection and copying by the Town.

6) Additional Conditions.

(a) The Permit will be in effect for one year, and will be automatically renewed for one year periods, unless the applicant is notified otherwise by the Wilton Sewer Commission.

(b) The Permit is non-transferable, and may be revoked by the Town for non-compliance, or modified so as to conform to discharge limitation requirements that are enacted by Federal or State Rules and/or Regulations.

(c) An industry proposing a new discharge or a change in volume or character of its existing discharge must submit a completed IDP Application to the Town at least 60 days prior to the commencement of such discharge. The submitted Application must include plans and engineering drawings, stamped by a registered professional engineer, of any proposed pretreatment facilities. Upon approval of the Application by Wilton Sewer Commission, a Discharge Permit Request is **sub-letted** by the community to the WS&PCD on behalf of the industry. Upon approval of the Discharge Permit Request by the WS&PCD, the industry and the Wilton Sewer Commission will enter into a new or amended IDP in accordance with the procedure outlined in this subpart.

(d) Industrial users will be assessed an annual fee by the Town to defray the administrative costs of the IDP program.

### SECTION 3

"National Categorical Pretreatment Standards".

(A) Notification. The Wilton Sewer Commission shall provide timely notification to appropriate industries of applicable categorical pretreatment standards.

(B) Compliance Date for Categorical Standards. Compliance with categorical pretreatment standards shall be achieved within three (3) years of the date such standards are effective, unless a shorter compliance time is specified in the standards.

(C) Amendment to IDP Required. An industrial user subject to categorical pretreatment standards shall not discharge wastewater directly or indirectly to Town wastewater facilities after the compliance date of such standards unless an Amendment to its IDP has been issued by the Town.

(D) Application for IDP Amendment. Within 120 days after the effective date of a categorical pretreatment standard, an industry subject to such standards shall submit an application for an IDP Amendment. The application shall contain the information noted under Section 2 (B) of this Article.

(E) Categorical Compliance Schedule Reports. Each user subject to a compliance schedule as required under Article IV, Section 2, B, 7, or 40 CFR.12(b)(7), shall report on progress toward meeting compliance with these regulations as follows:

1) Not later than 14 days following each date in the schedule, and the final date for compliance, the industrial user shall submit a progress report to the Wilton Sewer Commission indicating whether or not it complied with the increment of progress to be met on such date and, if not, the date on which it expects to comply, the reason for the delay, and the steps being taken by the industrial user to return the progress to the schedule established.

2) The time for any increment in the schedule, or the interval between reports required in paragraph (1), shall not exceed 9 months. An increment is the time between the dates for commencement and completion of major events leading to the construction and operation of pretreatment facilities necessary to achieve compliance with this ordinance and national categorical pretreatment standards.

(F) Report on Compliance with Categorical Standard Deadline. Within 90 days following the date for final compliance with applicable categorical pretreatment standards, or in the case of a new industrial user following introduction of wastewater into a Town sewer, any industrial user subject to pretreatment standards and requirements shall submit to the Wilton Sewer Commission, a report indicating the nature and concentration of all pollutants in the discharge from the regulated process which are limited by pretreatment standards and the average and maximum daily flow for these process lines. The report shall state whether the applicable pretreatment standards are being met on a consistent basis, and, if not, what additional operation and maintenance and/or pretreatment is necessary to bring the industrial user into compliance with the applicable pretreatment standard. This statement shall be signed by an authorized representative and certified to by a qualified professional engineer as defined in Article I, Section 3.

#### SECTION 4

"Slug Discharge Notification". Industrial users shall immediately notify the Town of any slug of process water discharged by such user to the Town's system.

#### SECTION 5

"Imminent Endangerment". The Wilton Sewer Commission may, after informal notice to the industry discharging wastewater to the public sewer, immediately halt or prevent any such discharge reasonably appearing to present an imminent endangerment to the health and welfare of person, or any discharge presenting, or which may present, an endangerment to the environment, or which threatens to interfere with operation of the public sewer or wastewater treatment facilities. Actions which may be taken by the Wilton Sewer Commission include ex parte temporary judicial injunctive relief, entry on private property to halt such discharge, blockage of a public sewer to halt such discharge, or demand of specific action by the industry.

#### SECTION 6

"Monitoring and Surveillance"<sup>1</sup>. The Wilton Sewer Commission shall as necessary sample and analyze the wastewater discharges of contributing industries and conduct surveillance and inspection activities to identify, independently of information supplied by such industries, occasional and continuing non-compliance with industrial pretreatment standard. Each industry will be billed directly for costs incurred for analysis of its wastewater. All industries discharging to the Town's system shall allow unrestricted access by Wilton Sewer Commission, WS&PCD, and EPA personnel for the purposes of investigating and sampling discharges from the industries.

## SECTION 7

"Investigations". The Wilton Sewer Commission shall investigate instances of non-compliance with industrial pretreatment standards and requirements.

## SECTION 8

"Public Information". Information and data submitted to the Wilton Sewer Commission under this Part relating to wastewater discharge characteristics shall be available to the public at least to the extent provided by CRF Section 2.302.

## SECTION 9

"Public Participation". The Wilton Sewer Commission shall comply with the public participation requirements of 40 CFR Part 25 in the enforcement industrial pretreatment standards and requirements. The Wilton Sewer Commission shall annually publish in the Milford Cabinet and the Manchester Union Leader, a list of the users which were in significant non-compliance with any pretreatment requirements or standards at least once during the 12 previous months. The notification shall also summarize any enforcement actions taken against the user(s) during the same 12 months. **???How to enforce??**

## ARTICLE V

### Sewer Line Extensions

#### SECTION 1

Main pipe extensions will be made subject to the following terms and conditions:

- (A) Main pipe extensions shall be laid by or to the specifications of the Wilton Sewer Commission and shall become the property of the Town of Wilton upon completion and its acceptable operation.
- (B) New streets or extensions of present streets in which main pipe extensions are to be made must have been laid out, lines and grades established in conformance with the specifications of the Wilton Sewer Commission.
- (C) The size and type of pipe shall be determined by the Wilton Sewer Commission in accordance with conditions surrounding the extension, including the possibilities of future expansion and fire protection.
- (D) This will apply to persons, businesses, industries or developers who request, through the Wilton Sewer Commission, a main pipe extension to primarily serve their particular property.
  - 1) The petitioner(s) shall finance the entire cost of the main pipe extension.
  - 2) Building Sewer Service Laterals, to be installed from the main to property line, shall be the responsibility of the petitioner of the main pipe extension. The number and location of such laterals for all buildings, lots of record, or lots that may be subdivided in the future shall be recommended by the Wilton Sewer Commission.
  - 3) There shall be no reimbursement to the main pipe extension petitioner(s) when abutters connect to the main pipe extension.
  - 4) All main pipe extensions and Building Sewer Laterals shall be laid in accordance with the Wilton Sewer Commission, Rules and Regulations of Sewer Use, Revised April 1981, or any subsequent revisions. clarify
  - 5) Wilton Sewer Commission shall require and provide at the petitioner(s) expense a full time inspector, who will be on site from start to completion of the project. An as built Mylar plan with three prints will be furnished to the Wilton Sewer Commission prior to the Wilton Sewer Commission's acceptance of the pipe line. ?Rev

SECTION 2

"Sewer Entrance Fee"

The entrance fee is an assessment against each property owner who desires to connect to the Town's sanitary sewerage system. The amount of the entrance fee is based on the following:

3/4" Water Service Supply Pipe	\$ 900.00
1" Water Service Supply Pipe	\$1,000.00
1.5" Water Service Supply Pipe	\$ 1,500.00
2" Water Service Supply Pipe	\$2,000.00

Over 2" Water Service Supply Pipe, the charge will be an additional \$1,000.00 for each additional inch diameter.

SECTION 3

"Sewer Connection Charge".

The owner who desires service from the municipal sewerage system shall pay all costs incurred to install the service pipe from the main to the property line.

SECTION 4 "Sewer Permit Fee".

Residential/Commercial	\$50.00	\$100
Industrial	\$75.00	\$150

ARTICLE VI  
PROTECTION FROM DAMAGE

SECTION 1

No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance, or equipment which is part of the wastewater facilities. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

SECTION 2

Upon any well founded information that this Ordinance is being violated, the Wilton Sewer Commission may seek an injunction in Superior Court and may take such other legal action as they deem appropriate including the levy of a fine of not more than five hundred (\$500) dollars for each day such violation exists. In addition, the Wilton Sewer Commission shall require and the violator shall be liable to the Town of Wilton for restitution for any damages occasioned on account of said violation.

ARTICLE VII  
Powers and Authority of Inspectors

SECTION 1

The Wilton Sewer Commission and/or other duly authorized employees of the Towns of Wilton and Milford bearing proper credentials and identification shall be permitted to enter all properties, in the presence of the Owner or their agent, for the purposes of inspection, observation, measurement, sampling, and testing pertinent to discharge to the community system in accordance with the provisions of the ordinance.

SECTION 2

The Wilton Sewer Commission or other duly authorized employees are authorized to obtain information concerning industrial processes which have a bearing on the kind and source of discharge to the public sewer. The industry may request that the information in question not be made available to the public if it can establish that revelation to the public might result in an advantage to competitors. The information in question shall be made available upon written request to governmental agencies for uses related to this ordinance, the NPDES permit, or the pretreatment program. The burden of proof that information should be held confidential rests with the industry. However, information about wastewater discharged by the industry (flow, constituents, concentrations and characteristics) shall be available to the public without restriction.

SECTION 3

While performing the necessary work on private properties referred to in Article VI, Section 1, the Wilton Sewer Commission, or duly authorized employees of the Towns of Wilton and Milford shall observe all safety rules applicable to the premises established by the company, the company shall be held harmless for injury or death to the Town of Wilton and Milford employees, and the Town shall indemnify the company against loss or damage to its property by Town employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Article III, Section 9.

SECTION 4

The Wilton Sewer Commission and/or other duly authorized employees of the Towns of Wilton and Milford, bearing proper credentials and identification, shall be permitted to enter all private properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the wastewater facilities lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

## ARTICLE VIII Sewer Rents and Assessments

### SECTION 1

A semi-annual charge (quarterly) is hereby imposed upon every owner whose premises are served by the sanitary sewer system of the Town either directly or indirectly, for the service rendered by the sewer system to the owners and other users of real property within the served area for the payment of the costs of construction and debt service of said system.

### SECTION 2

A semi-annual charge (quarterly) is also hereby imposed upon every owner whose premises are served by the sanitary sewer system of the Town (and from which premises sewage is being collected, either directly or indirectly), for the payment of the costs of operating, maintaining and repairing said system.

### SECTION 3

The semi-annual charge (quarterly) established by Section 1 of this Article for construction and debt service shall be based upon a unit system of measurement as follows:

- (A) Each single family dwelling shall be charged at the rate of one (1) unit.
- (B) Each multiple use building, other than a boarding house, tourist home, hotel or motel, with which space is allocated for business or professional offices, commercial occupancy .or apartments shall be charged at the rate of one (1) unit for each dwelling unit, apartment unit, professional, business or commercial space allocation.
- (C) Rooming houses, tourist homes, hotels and motels shall be charged at the rate of one (1) unit for each five hundred (500) square feet or major fraction thereof, of the gross floor area available for rent as determined by outside premises foundation measurement and floor count.
- (C) Restaurants, taverns, bars, grills and lodges, fraternal, charitable and religious organizations who maintain facilities for the preparation and serving of food and/or beverages shall be charged at the rate of two (2) units plus, in the event that said food and beverage facilities are in use five (5) days per week, a charge of one (1) unit for each fifty (50) seating spaces, or major fraction thereof, which is in excess of seventy-five (75) seating spaces.
- (E) Gasoline service stations and automotive sales and/or repair premises shall be charged at the rate of two (2) units plus one (1) unit for each stall, space or floor area used for the washing of automotive vehicles whether said stall, space or floor area be used for washing by manual, semi-automatic or automatic means.

Effective with 4<sup>th</sup> QTR 2017 billing until further notice, quarterly rate is \$120 per unit ...

(F) So-called car washes or other real premises devoted exclusively to the washing of automotive vehicles by manual, semi-automatic or automatic means shall be charged at the rate of one (1) unit for each stall, space or floor area devoted to said washing if operated twelve (12) hours, or less, in each twenty-four (24) hour day; to this charge shall be added the charge of one-half (1/2) unit for each said stalls, spaces or floor areas operated or usable in excess of twelve (12) hours in each twenty-four (24) hour day.

(G) Lodges, charitable organizations, corporations or associations organized and conducted to enable members to meet for divine worship shall be charged at the rate of one (1) unit unless other use chargeable under (D) above.

(H) Laundromats containing manual, semi-automatic, automatic or coin-operated washers shall be charged one (1) unit for each washer.

(I) Dry cleaning establishments, whether a portion of facilities devoted to the normal operation of a laundry or laundromat or a premises devoted exclusively to manual, semi-automatic, automatic, or coin-operated cleaning of wearing apparel in machines not using water as the cleaning agent shall be charged one (1) unit for each machine.

(J) Public or private schools, and governmental installations shall be charged at the rate of one (1) unit for each ten (10) or fraction thereof, students, teachers, custodians or other regular occupants.

(K) Commercial establishments, including but not limited to retail stores, wholesale distributors, light manufacturers, industrial plants, business operations, barber and beauty shops, banks, post offices, funeral homes, professional and business offices, lunch bars and other types of business enterprises not heretofore or hereinafter described shall be charged at the rate of one (1) unit for each ten (10) employees, or fraction thereof.

(L) In the event the use of any parcel of real property combines two (2) or more of the classifications herein set forth the number of units in each classification shall be determined, and the total thereof shall constitute the number of units to be charged to the entire parcel.

(M) Each potential building lot on an accepted street in the service area shall be assessed at the rate of one-quarter (1/4) unit. Rear or back lot lands adjudged suitable for development by the Planning Board shall be assessed at the rate of one-eighth (1/8) unit per acre.

(N) When a building is erected on a potential building lot during the amortization period of the sewer system, such premises shall be charged at the number of units applicable hereunder times the unit charge for the remaining years of amortization.

(O) The Town reserves the right to assess charges for use of the sanitary sewer system by contract in the event a customer does not fall within any of the above classifications.

(P) Any change in the number of applicable units chargeable to a premises shall be reported to the Sewer Commissioners upon its occurrence.

## SECTION 4

The semi-annual charge established by Article VIII, Section 2, for the costs of operating, maintaining and repairing the sewage and sewage treatment shall be based upon the unit system of measurement as detailed in Article VIII, Section 3 preceding, except as follows:

(A) Potential building lots (Article VIII, Section 3, Subsection M) will not be charged under this section.

(B) This charge may be assessed against premises not connected to an available public sewer upon expiration of any variance granted under Article III, Section 1.

## SECTION 5

The semi-annual charge established by Article IX, Section 2, will provide notification to each user in accordance with 40 CFR 35.929-2f annually of the rate and that portion of the user charge which is attributable to wastewater treatment.

## ARTICLE IX Penalties

### SECTION 1

Any person found to be violating any provision of this ordinance, except ARTICLE V, shall be served by the Wilton Sewer Commission with written notice stating the nature of the violation, and providing a reasonable time limit for the satisfactory correcting thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

The Wilton Sewer Commission may, after formal notice to the person discharging wastewater to the public sewer, immediately halt or prevent any such discharge reasonably appearing to present an imminent endangerment to the health and welfare of person, or any discharge presenting, or which may present, an endangerment to the environment, or which threatens to interfere with the operation of the public sewer or wastewater treatment facilities. Actions which may be taken by the Wilton Sewer Commission include ex parte temporary judicial injunctive relief, entry on private property to halt such discharge, or demand of specific action by the person.

### SECTION 2

Any person found to be violating any provisions of this ordinance except ARTICLE V shall be guilty of a violation as set forth in RSA 119-1:6 for each day of such violation after written notice to desist has been given and subject to such penalty as the Court may direct. Additionally, the Wilton Sewer Commission may pursue any other remedy for the enforcement of this ordinance available to it under applicable law.

### SECTION 3

Any person violating any of the provisions of this ordinance shall become liable to the Wilton Sewer Commission for any expense, loss, or damage occasioned the Wilton Sewer Commission by reason of such violation including but not limited to reasonable attorneys' fees, court costs, court reports' fees, and other expenses of litigation by appropriate suit at law against the person found to have violated this ordinance or the orders, rules, regulations, and permits issued hereunder.

### SECTION 4

Any person who knowingly makes any false statements, representation or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to this ordinance, or Industrial Discharge Permit, or who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required under this ordinance, shall, upon conviction, be punished by a fine of not more than \$1,000 or by imprisonment for not more than six (6) months, or by both.

## ARTICLE X

### Validity

#### SECTION 1

All ordinances, rules and regulations, or parts thereof in conflict herewith are hereby repealed.

#### SECTION 2

The invalidity of any section, clause, sentence, or provision of this ordinance shall not affect the validity of any other part of this ordinance which can be given effect without such invalid part or parts.

ARTICLE XI

Ordinance in Force

SECTION 1

This ordinance shall be in full force and effect from and after its passage, approval, recording, and publications as provided by law.

SECTION 2

Passed and adopted by the Wilton Sewer Commission on behalf of the Town of Wilton, New Hampshire:

INTRODUCED the 17 day of June, 19 87  
FIRST READING: 24 June 19 87  
SECOND READING: 1 July, 19 87

APPENDIX A

RESIDENTIAL OR COMMERCIAL BUILDING

SEWER CONNECTION APPLICATION

TOWN OF WILTON, NEW HAMPSHIRE  
BOARD OF SEWER COMMISSIONERS

RESIDENTIAL OR COMMERCIAL BUILDING SEWER CONNECTION APPLICATION

The undersigned, being the \_\_\_\_\_ of  
(Owner, Owner's Agent)

the property located at \_\_\_\_\_ Street,  
(Number)

does hereby request a permit to install and connect a building sewer to serve  
the \_\_\_\_\_ at said location.  
(Residence, Commercial Building, etc.)

1. The following indicated fixtures will be connected to the proposed building sewer:

Number	Fixture	Number	Fixture
_____	Kitchen Sink	_____	Water Closets
_____	Lavatories	_____	Bath Tubs/Showers
_____	Laundry Tubs/Washers	_____	Garbage Grinders
_____	Urinals		

Specify other fixtures \_\_\_\_\_

2. Estimated maximum number of persons who will use above fixtures  
is \_\_\_\_.

3. The name and address of person or firm which will perform the  
proposed work is \_\_\_\_\_.

4 Plans and specifications for the proposed building sewer are attached hereunto  
as Exhibit "A".

In consideration of the granting of this permit, the undersigned agrees:

- a. To accept and abide by all provisions of The Rules and Regulations of Sewer Use of the Wilton Board of Sewer Commissioners, and of all other pertinent ordinances or regulations that may be adopted in the future.
- b. To maintain the building's sewer at no expense to the Wilton Board of Sewer Commissioners.
- c. To notify the Wilton Board of Sewer Commissioners when the building sewer is ready for inspection and connection to the public sewer, but before any portion of the work is covered.

Date \_\_\_\_\_ Signed \_\_\_\_\_  
(Applicant)

(Address of Applicant)

Inspection fee paid:

\$ \_\_\_\_\_ By: \_\_\_\_\_

Entrance fee paid:

\$ \_\_\_\_\_ By: \_\_\_\_\_

- ( ) Disapproved (see statement of reasons attached)
- ( ) Approved subject to conditions attached
- ( ) Approved and Permit issued

Signed: \_\_\_\_\_

Signed: \_\_\_\_\_

Date: \_\_\_\_\_

Signed: \_\_\_\_\_

Becomes valid upon signatures of two commissioners.

INDUSTRIAL SEWER CONNECTION APPLICATION

TOWN OF WILTON  
AND  
MILFORD WASTWAER TREATMENT FACILITY  
RULES AND REGULATIONS OF SEWER USE

TOWN OF WILTON, NEW HAMPSHIRE  
BOARD OF SEWER COMMISSIONERS

INDUSTRIAL SEWER CONNECTION APPLICATION

The undersigned being the \_\_\_\_\_ of the  
(Owner/Owner's Agent)  
property located at \_\_\_\_\_  
does hereby request a permit to \_\_\_\_\_ an industrial sewer  
(Install/Use)  
connection serving \_\_\_\_\_  
(Name of Company)  
which company is engaged in \_\_\_\_\_  
at said location.

1. A plan to the property showing accurately all sewers and drains now existing is attached hereunto as Exhibit "A".
2. Plans and specifications covering any work proposed to be performed under this is attached hereunto as Exhibit "B".
3. A complete schedule of all process waters and industrial wastes produced or expected to be produced at said roperty including:
  - a) Type of Operation - A description of those operations that result in waste discharges. List and describe each waste discharging operation and average daily volume of each operation. List materials that will be contained in each discharge. Include in the description estimated quantities of each material discharged.
  - b) Volume of wastes to be discharged

Peak Rate	gpm (gallons per minute)
Maximum Hourly Rate	gpm
Maximum Daily Rate	gpm
Average Monthly Rate*	gpd (gallons per day)

\*Total gallons of waste discharged in month divided by calendar days in month.

c) Batch Discharges - Describe in terms of duration, rate of flow, and waste quality any discharges which occur for short periods of time such as when a tank or other vessel is emptied or during a wash up.

4. Furnish all information as may be required to process the WS&PCD Discharge Permit Request. All industrial waste discharges are subject to permit and associated conditions regardless of quality or quantity. Submission of a Discharge Permit Request for an Industrial Wastewater Discharge should be accompanied by the following:

a) Name, address of industry.

b) Name and telephone number of responsible individual at industry (i.e., Plant Manager, Plant Engineer, President or Vice President of company, etc.).

c) Type of industry (SIC code if available).

d) Is industry subject to National Categorical Standards? If so, state which.

e) Flow, gpd, number of discharge locations and respective flow in each; number of shifts worked per day.

f) Plans and specifications for any and all treatment devices, stamped by a professional engineer.

g) A line diagram showing the production process, to include the origin of each waste stream.

h) Analyses of the waste stream(s) to be discharged. Analyses should include testing for those parameters expected to be present, and those regulated by National Categorical Standards or Local Sewer Use Ordinances.

i) A map showing the location within city/town of the industrial facility with respect to the treatment plant.

j) A listing of all chemicals used in the facility which could be discharged, i.e., production chemicals, degreasers, cleaning solvents, etc., together with applicable Material Safety Data Sheets.

k) A description and location diagram of all sampling locations at the industrial facility.

l) A narrative describing those measures taken to reduce water usage, flow restricters, counter current rinses, recycle of non-contact cooling water, etc.

In consideration of the granting of this permit the undersigned agrees:

1. To furnish any additional information relating to the installation or use of the industrial sewer for which this permit is sought as may be requested by the Wilton Board of Sewer Commissioners.

2. To accept and abide by all provisions of The Rules and Regulations of Sewer Use of the Wilton Board of Sewer Commissioners, and of all other pertinent ordinances or regulations that may be adopted in the future.
3. To operate and maintain any waste pretreatment facilities, as may be required as a condition of the acceptance into the wastewater treatment system of the industrial wastes involved, in efficient manners to all times, at no expense to the Wilton Board of Sewer Commissioners.
4. To cooperate at all times with the Wilton Board of Sewer Commissioners and its representatives in their inspecting, sampling, and study of the industrial wastes, and any facilities provided for pretreatment.
5. To notify the Wilton Board of Sewer Commissioners immediately in the event of any accident, or other occurrence that occasions contribution to the wastewater treatment system of any wastewater or substances prohibited or not covered by this permit.

The undersigned also agrees and is aware the granting of this permit is only for the installation of the industrial sewer connection and further understands that a separate Industrial Discharge Permit must be applied for and granted before the actual discharge of wastes can occur.

### ADDENDUM III

#### Reporting Requirements

A report will be filed semiannually by the holder of the Industrial Discharge Permit. These reports will be due in January and July of each year unless indicated otherwise. The reports will contain, as a minimum, the following information: {

- 1.) Name and address of facility including names of operators and owners.
- 2.) List of all environmental permits held by or for the facility.
- 3.) Brief description of the nature, average rate of production, and Standard Industrial Classification of the operations carried out at the facility.
- 4.) Identification of the categorical pretreatment standards applicable to each regulated process.
- 5.) Analysis identifying the nature and concentration of pollutants in the discharge. Reporting for each sample shall include:
  - a) The date, exact place, method and time of sampling, and the names of person or persons taking the sample;
  - b) The dates analyses were performed;
  - c) The laboratory performing the analyses;
  - d) The analytical techniques and methods used;
  - e) The results of such analyses.
- 6.) Information showing the measured average daily and maximum daily flow, in gallons per day, to the public sewer from regulated process streams and from other streams.
- 7.) A statement whether the applicable categorical pretreatment standards and effluent limitations are being met on a consistent basis and, if not, what additional operation and maintenance practices and/or pretreatment are necessary.
- 8.) The reports shall be signed by an authorized representative.
- 9.) Additional information as determined by the Wilton Sewer Commission may also be required.

WILTON SEWER ORDINANCE

Revisions Adopted 31 August 1988

Article I. Section 2:

Shall now read: "Approval authority shall mean the Regional Administrator of the E.P.A."

Article III, Section 6 (D):

Shall now read: "Require control over the quantities and rates' of discharge and..."

Article IV. Section 2 (A):

Shall now read: "IDP required. The discharge by significant industrial users to the Town's wastewater works or to a public or private sewer connected to the Milford Wastewater Facilities is prohibited without a valid industrial discharge permit (.IDP)."

Article III. Section 10:

Shall now read: "All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined by the Code of Federal Regulations, Title 40, Part 136 (40 CFR 136) whenever applicable. All measurements, tests and analysis methods shall be approved by the Regional Administrator of the E.P.A."

Article IV, Section 2 (C) 6 A:

Shall now read: "The permit will be in effect for one (1) year. Compliance with all existing regulations will be the basis for renewal."

Article IV, Section 3 (C):

Delete.

Article IV. Section 3 (D):

Delete.

WILTON SEWER ORDINANCE

Revisions Adopted 31 August 1988

Article IX. Section I. Paragraph 1:

Shall now read: "Any person found violating permit provisions and any provisions of this ordinance, except Article V, shall be served by the Wilton Sewer Commission with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correcting thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations."

Article IX, Section 2:

Shall now read: "Any person found to be violating permit provisions and any provisions of this ordinance, except Article V, shall be guilty of a violation as set forth in RSA 149-1:6 for each day of such violation and subject to such penalty as the court may direct. Additionally, the Wilton Sewer Commission may pursue any other remedy for the enforcement of permit provisions and this ordinance available to it under applicable law."

REVISIONS PASSED AND ADOPTED BY THE WILTON SEWER COMMISSION ON BEHALF OF THE TOWN OF WILTON, NEW HAMPSHIRE.

Approved this 31 day of August 1988

 Signed  
Paul A Desrochers
